It's in our nature

Corporate Environmental Policy

Already a leader in the manufacturing of floor coverings, we, at Beaulieu Canada, recognize our social responsibility towards the prevention of pollution.

We believe that the achievement of our objectives must be done with respect to the environment for present life and future generations. In order to help us to fulfill this commitment, we have implemented our continuous improvement practices and follow the following guiding principles:

- To respect the demands of the law and regulations and any other requirements applicable;
- To support the sustainability of natural resources;
- To manage waste responsibly and effectively;
- To evaluate and prevent environmental risks;
- To consider prevention of pollution in our manufacturing processes and development of products;
- To check our environmental performance periodically and to communicate the results;
- To collaborate with the community.

The implementation of this policy will be possible by informing and increasing awareness among our employees and business partners.
