

...the environment matters.

At Beaulieu Canada, change is in the wind. Indeed, we were the first carpet mill to source 100% of our energy from renewable sources. Today, all three of our Canadian mills are run with hydroelectric energy supplemented from wind farms while all of Beaulieu Commercial mills obtain 100% of their energy from wind farms.

We are committed to creating fashion flooring solutions designed to make a beautiful impact on the lives of our customers, while reducing our impact on the world's natural resources. We are proud to be putting our energy into achieving greater sustainability because...the environment matters for us all. And that's an approach that's a breath of fresh air.

These are just a few of the carpet styles manufactured using renewable energy.
